# GET OUT FROM BEHIND THE BARS

*Guadalupe Island,  
Mexico*

109 GREAT WHITE SHARKS & COUNTING AT GUA-  
DALUPE ISLAND!

We are divers. We believe the best way to observe great white sharks is to descend into their world and interact with them on their own terms from our double-decker submersible cages. Conditions permitting, you can get out from behind the bars on the upper deck of these cages with only a single hand-rail between you and these incredible apex predators. Our highly experienced divemasters in the submersible cages are always there to both “critter point” and ensure your safety. This is the best way to see great whites and you will be rewarded with lots of “whiteys” swimming around up close and very personal. Visibility at Guadalupe is typically 125-150 feet in gorgeous blue water.

# DIVE WITH THE FRIENDLY GIANTS

## *Socorro Island, Mexico*

THE GIANT MANTAS, DOLPHINS, HUMPBACK WHALES AND HAMMERHEAD SHARKS OF SOCORRO, MEXICO.

Socorro is famous for some of the most amazing, close-up, big animal diving interaction in the world. We have years of know-how and highly experienced divemasters and crew to ensure unforgettable, up-close, intimate encounters and the experience of a lifetime with giant mantas and bottlenose dolphins. Large tuna, wahoo and six different kinds of sharks frequent these dive sites as well as seasonal visitors: humpback whales, whale sharks and schooling hammerheads. Visiting these islands is like taking a step back in time and there is no finer or more seaworthy and comfortable vessel to do it than on the Nautilus Explorer.

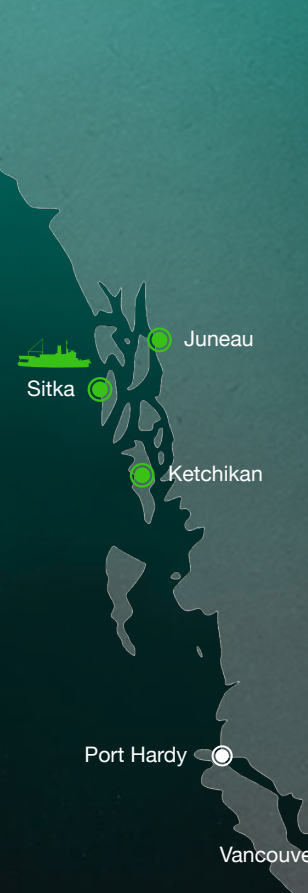

# EXPERIENCE THIS AT LEAST ONCE

## *Alaska*

ALASKA IS STUNNING AND SPECTACULAR.

This is some of the best cold water diving in the world. The animals topside are just as enthralling as the critters below surface; grizzly bears ambling along the beach, bald eagles more numerous than seagulls, humpback whales blowing right beside the back deck water level as you sip your morning coffee. This is the full meal deal that every diver should experience at least once.

# A MUST DO FOR ANY COLD WATER DIVER

## *British Columbia*

B.C. DIVING IS HEAVEN FOR THOSE WHO APPRECIATE AND ENJOY THE CHALLENGE OF DRY-SUIT DIVING.

Expect incredible colour. Amazing diversity of life. Giant pacific octopus. Wolf-eels. Nudibranchs galore. Giant kelp forests. Vertical walls so densely covered in life that there isn't even a square inch in which you can touch the wall. It's no wonder that this was ranked as the best diving in the North America 3 years in a row.
